

# TARDEC Environmental Policy

## 19 November 2001

**UNCLAS: Dist A. Approved for public release**

TARDEC's Environmental Management Policy affirms our intent to operate in an environmentally responsible manner, with emphasis on continually improving the environmental performance of our products, services and processes. TARDEC's mission is to conduct research, development and engineering to maintain global technological superiority in military ground vehicles and advance the role of science in the broader national interest. To this end, all TARDEC Associates will strive to conduct their activities in support of the following principles:

- Ensure compliance with applicable Local, State and Federal environmental laws, regulations and policies.
- Minimize pollution and adverse effects to the environment where practical.
- Monitor progress toward achieving established environmental goals.
- Educate all associates on their responsibilities for the incorporation of environmental considerations into activities as dictated by standard operating procedures (SOPs).
- Communicate relevant information on our proactive environmental initiatives to interested parties and the general public upon request.

Richard E. McClelland  
Director of Tank Automotive Research,  
Development and Engineering Center
